About This Game

Star Command Galaxies is the ultimate starship simulator. Become Captain and recruit your crew, build your ship, explore a randomly generated universe and battle alien ships across the galaxy.

You start from humble beginnings in your very own shuttle, taking on various missions at starbases located on the galactic map. As you complete your tasks you will earn money, xp and equipment to help you hire new crew members and purchase a larger ship. Continue cleaning the stars of the vermin that inhabit it including zombies and space pirates.

With your success comes more challenges. Keeping your crew happy is critical to your success. You must keep them fed, well rested and entertained or they will pick up new "quirks" to their personality. A good captain will see their crew earn "perks" - personality bonuses that will help you battle your foes.

New enemies will arrive to challenge you and your crew and it will be up to you to create the ultimate vessel to defeat them.

Star Command Galaxies will be regularly updated with new races, missions, planets, equipment, ships and much more!

Title: Star Command Galaxies
Genre: Indie, Simulation, Strategy, Early Access
Developer:
Warballoon
Publisher:
Warballoon
Release Date: 17 Sep, 2015

a09c17d780

The game has slowly been improving, and I appreciate the work the developers are putting into their idea. It has slowly been getting to their vision of "Open World Star Command", and its been fun to participate in the beta every once and a while when a new update comes out, thanks for the work Warballoon, I see your struggle.. Only suggesting with thumb up because the game is currently being worked on and has great potential. However if you read this review, know that the game has lots of bugs right now and it is early access. I guarantee if you feel this will be an enjoyable bug free experience, you will be disappointed. This is under heavy' development and bug testing. Numerous game breaking bugs, save and loading problems, ect. The developers are great btw, they reply to messages and bug fix often.. On mobile it made sense. On PC it's a raging dumpster fire. I am upset with myself for having spent money on this absolute garbage.

I can get used to a game with quirky controls and terrible camera, but the UI disappears on the second mission. Making it impossible for me to even click the "ok" circle to even begin the mission.

Save yourself the trouble and don't buy it when it's on sale, and don't pick it up for free. Knowing what I know now I would have demanded \$36,005.00 to even download this garbage.. this game is awesome for me i like it like i have to control the galaxy or fight rebels or be a pirate my self and attack star command there is a little problem tho bugs pls fix them i love your game by the way. So buggy and barely playable
